

Murrow here gives some good, unique insights as to why men tend to shy away from church attendance and involvement. He explains that today's church has become much more feminine than the New Testament church in its meetings and ministry. He provides helpful tips on getting more men involved in congregational life, with an underlying theme of restoring more masculinity to Christian gatherings.

Among church growth/Christian living books, this title is unique. I recommend it to church leaders wanting new insights on how to get men back into the church.
